Education

Maharaja Agrasen Institute of Technology	Delhi, India
B.Tech. Information Technology - 8.39	*Dec 2021 -July 2025*
Saraswati vidya mandir	Ghaziabad, UP
XII-CBSE-91%	*July 2018-July 2020*

Experience

Full Stack & Data Engineering Intern — March 2024– present

2.0.1 Baavlibuch
Remote, Delhi India

- A startup working on healthcare and anti ageing
- currently working on product named dpp(digital-presciption-pad) on full-stack technologies like **react,nodejs**, and **mongo**

Fullstack web developer Intern — July. 2023– Oct 2023

2.0.2 Prosecdevs
Remote, India

- Led the development of **safeyourweb.com** and **prosecdevs.com**, implementing **role-based backend** access and creating admin panels using **Node.js and Express.js**
- Crafted visually appealing UIs for both sites with **React-TSX**, demonstrating attention to detail and a user-centric design approach.
- Executed various small projects, showcasing adaptability and continuous learning in diverse technology landscapes(converted backend api of ibharat(an indian search engine) from **php to Nodejs** using chatgpt)

Projects Links

Safeyourweb.com | *React, NodeJs, ExpressJs, SQL, Framer-motion*

- Developed a secure Node.js Express.js backend, integrating SQL for efficient data handling.
- Designed a user-friendly React.js frontend with engaging animations using Framer Motion
- Led the creation of Safeyourweb, a web app providing customized security solutions, showcasing project leadership
- Ensure smooth data transmission to the SQL database.

Leetcode-Dashboard | *React,Chartjs,Tailwind, API-integration,State-management*

- Created a LeetCode Dashboard in React, utilizing **useContext** for state management and LeetCode API for dynamic data
- Designed an interactive dashboard using **Chart.js**, enhancing data visualization, and employed Tailwind CSS for a responsive UI
- Demonstrated proficiency in React, **API integration**, and UI design, ensuring an impactful and user-friendly LeetCode experience.

Bitcoin-wallet-library | *JavaScipt,Bitcoinjs, Git*

- A comprehensive library designed for creating and managing Bitcoin wallets.
- Includes features for checking balances and performing transactions seamlessly.

Technical Skills

Languages: C++(Data Structures and algorithm), Python, SQL (Mariadb), JavaScript, HTML/CSS
Frameworks : React, Node js, Express js,Tailwind CSS
Developer Tools: Git, Vs-code,Postman, Jupyter Notebook
Libraries: pandas, NumPy, Matplotlib,Chart-JS, Framer-Motion

ACHIEVEMENTS

Completed Advanced Data Structures and Algorithms in C++ from Coding Ninjas with certification
Selected for Innerve-Hack(IGDTUW Hackathon) 3rd round after clearing DSA round
Contributed to Hactoberfest-2022
